# LAUNCH INTO ANEW SPHERE

## INTRODUCTION

Norske Skog is a world leading producer of publication paper with strong market positions in Europe and Australasia. Publication paper includes newsprint and magazine paper. Norske Skog operates five mills in four countries. Norske Skog has an annual publication paper production capacity of 2.1 million tonnes. Four of the mills are in Europe and one in Australia. Newsprint and magazine paper are sold through sales offices and agents to over 80 countries. The group has approximately 2 100 employees. Of the four mills in Europe, two will produce recycled containerboard following conversion projects. In

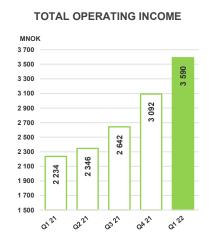

addition to the traditional publication paper business, Norske Skog aims to further diversify its operations and continue its transformation into a growing and high-margin business through a range of exciting bio products and energy projects.

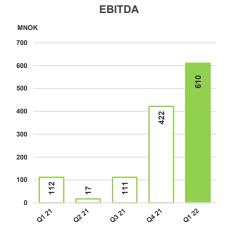

The parent company, Norske Skog ASA, is incorporated in Norway and has its head office at Skøyen in Oslo. The company is listed on Oslo Stock Exchange with the ticker NSKOG.

## REPORT OF THE BOARD OF DIRECTORS FOR THE FIRST QUARTER OF 2022

## o Energy and raw material prices remain volatile

• Further price increases required and implemented to address unprecedented market conditions

## EBITDA of NOK 610 million in the quarter

- EBITDA improvement from previous quarter with margins normalising towards the >10% area
- Impacted by gain of NOK 175 million from sale of the Nature's Flame pellets business

## Publication paper market remains tight

- Further industry closures from the second half of 2022
- Norske Skog Bruck PM3 to stop production in the third quarter of 2022 to finalise the conversion process

## Norske Skog Bruck waste-to-energy facility in commissioning

- Under commissioning with Valmet and currently operating at 75%
- Improves the energy situation and reduces the fossil CO2 footprint for Norske Skog Bruck

## PROFIT/LOSS FOR THE PERIOD

| NOK MILLION            | Q1 2022 | Q4 2021 | Q1 2021 | YTD 2022 | YTD 2021 |
|------------------------|---------|---------|---------|----------|----------|
|                        |         |         |         |          |          |
| Operating revenue      | 3 326   | 2 980   | 2 154   | 3 326    | 2 154    |
| Other operating income | 264     | 113     | 80      | 264      | 80       |
| Total operating income | 3 590   | 3 092   | 2 234   | 3 590    | 2 234    |
| Distribution cost      | -299    | -291    | -295    | -299     | -295     |
| Cost of materials      | -2 020  | -1 800  | -1 237  | -2 020   | -1 237   |
| Fixed cost             | -660    | -580    | -591    | -660     | -591     |
| EBITDA                 | 610     | 422     | 112     | 610      | 112      |

Higher operating revenue in the first quarter compared to the previous quarter was driven by increased prices. Publication paper prices were increased further in the first quarter, which was necessary to mitigate the effect of higher input costs while maintaining sustainable margins.

Raw material prices remained high while energy prices remained high and volatile in the first quarter. This has resulted in continued and significant cost pressure upwards necessitating some down time in the quarter.

Cost of materials increased significantly compared to the previous quarter, both in total and on a per tonne basis. The main cost increase in the quarter relates to significant increases in energy prices, both electricity and gas. Recovered paper (RCP) prices have remained at high levels as in previous quarters.

Fixed costs (including employee benefit expenses) increased compared to the previous quarter, both in total and on a per tonne basis as a result of an increase in long-term incentive valuation and high operating rate.

EBITDA increased quarter-over-quarter, but the majority of the increase relates to the gain from the sale of Nature's Flame.

The publication paper market balance remains tight following significant capacity closures in 2021. Utilisation was 94 % for Norske Skog in the first quarter of 2022, driven by a tight publication paper market.

## NORSKE SKOG QUARTERLY REPORT - FIRST QUARTER 2022 (UNAUDITED)

| NOK MILLION                                  | Q1 2022 | Q4 2021 | Q1 2021 | YTD 2022 | YTD 2021 |
|--|---------|---------|---------|----------|----------|
| Restructuring expenses                       | 0       | -12     | -3      | 0        | -3       |
|  | 111     |         |         |          |          |
| Depreciation                                 | -114    | -115    | -104    | -114     | -104     |
| Impairments                                  | 0       | 22      | 0       | 0        | 0        |
| Derivatives and other fair value adjustments | 97      | 163     | 199     | 97       | 199      |
| Operating earnings                           | 593     | 479     | 204     | 593      | 204      |

Depreciation of NOK 114 million is in line with previous guarters.

The fair value of energy contracts in Norway increased compared to the previous quarter because of an increase in expected electricity prices in the market.

| NOK MILLION                             | Q1 2022 | Q4 2021 | Q1 2021 | YTD 2022 | YTD 2021 |
|---|---------|---------|---------|----------|----------|
| Share of profit in associated companies | -1      | -5      | 0       | -1       | 0        |
| Financial items                         | 1       | 5       | 1       | 1        | 1        |
| Income taxes                            | -10     | -80     | -11     | -10      | -11      |
| Profit/loss for the period              | 583     | 400     | 194     | 583      | 194      |

Financial items were positive by NOK 1 million in the first quarter. Interest cost and other financial costs were in line with the previous quarter. NOK was stronger against EUR at the end of first quarter resulting in foreign exchange gain on debt denominated in EUR offsetting interest and financing costs.

The income taxes in the quarter relate to the operations in Norske Skog Golbey.

## **DIVERSIFICATION BEYOND PUBLICATION PAPER**

The conversion to production of containerboard is progressing at Norske Skog Bruck and Norske Skog Golbey. The paper machine PM3 at Norske Skog Bruck will cease production of newsprint in the third quarter of 2022. Norske Skog Bruck will be in the recycled containerboard market during the first quarter of 2023, and will put Norske Skog on the path to become a leading European independent producer of recycled containerboard. The preparatory work and ordering of equipment for conversion to containerboard at Norske Skog Golbey is also underway, with first production expected to commence during the fourth quarter of 2023.

The machines are expected to operate at 60-70% utilisation in the first year and reach full utilisation during the third year of production. Once at full utilisation, the machines are expected to generate annual

EBITDA of EUR 70-80 million, based on historical prices and margins seen in the market.

Following first commercial sales for CEBINA at end of 2020, the work to qualify CEBINA in coatings, paints and adhesives has continued in the quarter.

The construction of the CEBICO (bio composites) pilot was completed in the fourth quarter of 2021. The pilot has a capacity of 300 tonnes annually. During the first quarter of 2022, production of CEBICO granules from the pilot has commenced and lay the foundation for continued commercial work.

Beyond the above-mentioned initiatives, the group continuously works to develop several other fibre and energy related growth projects, both on a stand-alone basis and in partnerships.

## SEGMENT INFORMATION

## **PUBLICATION PAPER EUROPE**

| NOK MILLION                                 | Q1 2022 | Q4 2021 | Q1 2021 | YTD 2022 | YTD 2021 |

| Production / capacity (%)                   | 94      | 96      | 88      | 94       | 88       |

The segment consists of Norske Skog's European operations in the publication paper market with industrial sites in Norway, France and Austria. Annual production capacity is approximately 1.8 million tonnes.

Operating income increased from the previous quarter due to higher sales prices, but partly offset by lower delivered volumes. The price increases for publication paper in the quarter were necessitated by increasing cost of materials.

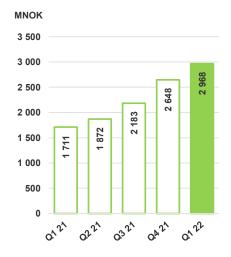

Distribution costs increased from the previous quarter on an absolute level and on a per tonne basis driven by higher freight rates. Cost of materials increased significantly in total and on a per tonne basis, mainly due to higher energy prices in the quarter. Employee benefit

expenses increased in the quarter, both on an absolute level and on a per tonne basis.

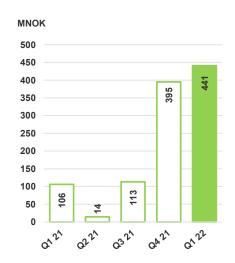

Demand for standard newsprint in Europe decreased by 6% as of February 2022 compared to the same period last year. Magazine paper demand decreasing 5%, with supercalendered paper at same level as last year and lightweight coated paper decreasing 9%. (Source: Eurograph).

Capacity utilisation was 94% in the period, in line with the previous quarter of 96%.

The segment consists of Norske Skog's publication paper operations in Australasia. The annual production capacity is approximately 0.3 million tonnes. The Norske Skog Boyer mill is the only domestic publication paper producer in the region.

Operating income increased slightly compared to previous quarter due to higher prices.

Distribution costs increased compared to the previous quarter on an absolute level and on a per tonne basis, due to higher freight rates. Cost of materials increased in the quarter on an absolute and a per

tonne basis due to higher energy and raw material costs. Employee benefit expenses increased in total and on a per tonne basis.

EBITDA decreased compared to the previous quarter, mainly driven by cost increases outpacing price increases in the quarter.

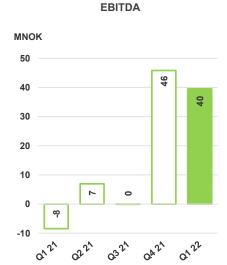

Demand for newsprint in Australasia decreased by 8 % as of March 2022, compared to the same period last year. (Source: official statistics).

Capacity utilisation was 91% in the period, and increase compared to the previous quarter.

#### **OTHER ACTIVITIES**

| NOK MILLION            | Q1 2022 | Q4 2021 | Q1 2021 | YTD 2022 | YTD 2021 |
|------------------------|---------|---------|---------|----------|----------|
| Total operating income | 222     | 71      | 60      | 222      | 60       |
| EBITDA                 | 130     | -19     | 14      | 130      | 14       |

Operating income in other activities mainly consist of non-paper related operations defined as Green Energy which includes pellets and biogas.

In the first quarter, Norske Skog sold Nature's Flame, leading to a gain of NOK 175 million in the quarter which impacted EBITDA.

Other activities also include unallocated headquarter costs. The first quarter saw an increase in the valuation of the long-term incentive programme, which impacted the EBITDA negatively. The unallocated headquarter costs are estimated to be EBITDA negative by approximately NOK 35 million annually but are not uniformly distributed throughout the quarters of the year.

#### NORSKE SKOG - QUARTERLY REPORT - FIRST QUARTER 2022 (UNAUDITED)

Net cash flow from operating activities was positive NOK 196 million in the first quarter.

The operating cash flow was negatively impacted by change in working capital of NOK -172 million, mainly driven by an increase in trade and other receivables as a result of higher sales prices.

Gain and losses from divestment mainly include the gain from the sale of Nature's Flame.

Taxes paid in the first quarter relate to operations in Norske Skog Golbev.

Maintenance capex of NOK 23 million relates to ordinary maintenance in the quarter, a decrease from the fourth quarter which generally sees higher maintenance.

Remaining purchases of property, plant and equipment and intangible assets relate to investments in the waste-to-energy facility at the Norske Skog Bruck and the packaging paper projects at Norske Skog Bruck and Norske Skog Golbey.

## **BALANCE SHEET**

| NOK MILLION   | 31 MAR 2022 | 31 DEC 2021 | 31 MAR 2021 |
|---|-------------|-------------|-------------|
|   |             |             |             |
| Non-current assets  | 4 520       | 4 538       | 4 319       |
| Cash and cash equivalents   | 1 676       | 1 489       | 1 622       |
| Inventories, trade and other receivables and other current assets | 3 797       | 3 098       | 2 621       |
| Total assets  | 9 994       | 9 125       | 8 562       |
| Equity  | 3 660       | 3 133       | 3 677       |
| Non-current liabilities   | 3 515       | 3 391       | 2 834       |
| Current liabilities   | 2 819       | 2 600       | 2 051       |
| Net interest-bearing debt   | 924         | 1 054       | 401         |

Total assets increased in the first quarter mainly due to an increase in cash and cash equivalents, trade and other receivables and other current assets.

In total, cash and cash equivalents increased to NOK 1 676 million from NOK 1 489 million at previous quarter end. The increase is a result of positive operating cash flows in the quarter, settlement of the sale of Nature's Flames, and reduced by investment in property, plant and equipment offset by new loans raised.

Non-current liabilities increased slightly from previous quarter. Local debt to finance the waste-to-energy plant in Austria was fully drawn with EUR 54 million at quarter end, compared to EUR 45 million at the end of previous quarter. Debt to finance the packaging paper projects at Norske Skog Bruck and Norske Skog Golbey was drawn with approximately EUR 29 million at quarter end, compared to EUR 19 million at previous quarter end.

Net interest-bearing debt decreased from NOK 1 054 million to NOK 924 million in the quarter.

## **OUTLOOK**

The unprecedented increases and volatility seen for the largest input factors, particularly energy, are expected to remain in the coming months. The continued price pressure for energy, recovered paper and other input costs in 2022 may result in further publication paper price increases for all grades in Europe.

The ongoing invasion of Ukraine by Russia continues to create uncertainty in the development of the global economy and raw material markets and in particular the European energy markets, which is important for Norske Skog's operations. Disruptions in global supply chains may cause further operational challenges in 2022.

The significant capacity closures and conversion to packaging paper in the industry continues to positively impact the market balance for publication paper. Additional capacity closures have been announced for 2022 and 2023. Operating rates are expected to remain high for the industry during 2022.

The waste-to-energy facility at Norske Skog Bruck is in the commissioning phase and is currently operating at 75% utilisation. The facility will substantially reduce gas consumption and thus CO2 emissions for Norske Skog Bruck.

At Norske Skog Bruck, the production of newsprint will cease in the third quarter, and Bruck will enter the packaging paper market in the first quarter of 2023. Norske Skog Golbey is preparing for establishing packaging paper production, which is expected to commence in the fourth quarter of 2023.

Norske Skog continues to develop business opportunities for CEBINA and CEBICO. This includes evaluating a potential capacity increase for CEBICO beyond the existing 300 tonnes annual pilot-scale capacity. The pilot facility will enable production and delivery of larger test volumes.

## NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

## 1. GENERAL INFORMATION

Norske Skog ASA ("the company") and its subsidiaries ("the group" or "Norske Skog") produce, distribute and sell publication paper. This includes newsprint and magazine paper.

All amounts in the interim financial statements are presented in NOK million unless otherwise stated. Due to rounding, there may be differences in the summation of columns and rows.

The table below shows the applied average (un-weighted monthly) foreign exchange rates per quarter and the closing exchange rate at month ends for the most important currencies for the group.

|     | Q1 2022 | Q4 2021 | 31 MAR 2022 | 31 DEC 2021 | 31 MAR 2021 |
|-----|---------|---------|-------------|-------------|-------------|
| AUD | 6.40    | 6.36    | 6.55        | 6.40        | 6.49        |
| EUR | 9.93    | 9.97    | 9.71        | 9.99        | 10.00       |
| GBP | 11.88   | 11.76   | 11.48       | 11.89       | 11.73       |
| NZD | 5.98    | 6.06    | 6.06        | 6.03        | 5.96        |
| USD | 8.85    | 8.72    | 8.75        | 8.82        | 8.52        |

## 2. ACCOUNTING POLICIES

The interim financial statements of Norske Skog have been prepared in accordance with IAS 34 Interim Financial Reporting. The interim financial statements do not include all information required for full annual financial statements and should be read in conjunction with the consolidated financial statements for 2021. The interim financial statements are unaudited.

The accounting policies applied in the preparation of the interim financial statements are consistent with those applied in the preparation of the consolidated financial statements for the year ended

31 December 2021, except for the adaptation of amended standards and new interpretations, which are mandatory from 1 January 2022. These changes are described in the consolidated financial statements for 2021.

The group has not early adopted any standard, interpretation or amendment that has been issued but is not yet mandatory.

## 3. ESTIMATES, JUDGEMENTS AND ASSUMPTIONS

Preparation of interim financial statements in accordance with IFRS implies use of estimates, which are based on judgements and assumptions that affect the application of accounting principles and the reported amounts of assets, liabilities, revenues and expenses. Actual amounts might differ from such estimates.

Estimated decline in value of property, plant and equipment, and investments in associated companies

Property, plant and equipment are tested for possible impairment charges whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. A prolonged decrease in prices or demand beyond the historical level could be an indicator of impairment and an impairment test will be prepared. The recoverable amount is the higher of an asset's fair value less sales costs or its value in use. Value in use is the present value of the future cash flows expected to be derived from a cash-generating unit. The key drivers of profitability in the industry and thus asset values for Norske Skog are product prices relative to production costs.

#### Commodity contracts

Norske Skog's portfolio of commodity contracts consist mainly of contracts that are settled through physical delivery. Embedded derivatives in commodity contracts are measured at fair value and embedded derivatives that are not traded in an active marked, are assessed through valuation techniques.

The fair value of embedded derivatives in physical contracts vary depending on changes in currency and price indexes.

Commodity contracts that fail to meet the own-use exemption criteria in IFRS 9 *Financial* instruments – recognition and measurement are recognised in the balance sheet and valued at fair value.

The group uses its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at each balance sheet date. See Note 17 in the consolidated financial statements for 2021 for more information regarding the calculation of fair value of derivatives.

#### Provisions

Provisions for environmental restoration, dismantling costs, restructuring activities and legal claims are recognised when the group has a present legal or constructive obligation as a result of past events, an outflow of resources is more likely than not to be required to settle the obligation and the amount can be reliably estimated.

Provisions for future environmental and dismantling liabilities are based on a number of assumptions made using management's best judgment. See Note 3 in the consolidated financial statements for 2021 for a more thorough description of important accounting estimates and assumptions impacting the preparation of financial statements.

## NORSKE SKOG QUARTERLY REPORT - FIRST QUARTER 2022 (UNAUDITED)

#### Contingent liabilities

Norske Skog is an international company that, through its ongoing business operations, will be exposed to litigation and claims from public

authorities and contracting parties as well as assessments from public authorities in each country it operates.

## 4. PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

| JAN-MAR 2022                      | PROPERTY,<br>PLANT AND<br>EQUIPMENT | RIGHT-OF-USE<br>ASSETS | TOTAL<br>PROPERTY<br>PLANT AND<br>EQUIPMENT | INTANGIBLE<br>ASSETS |

| Additions*                        | 407                                 | 4                      | 410   | 0                    |
| Depreciation                      | -102                                | -10                    | -111  | -2                   |
| Disposals                         | -66                                 | -9                     | -74   | 0                    |
| Currency translation differences  | -82                                 | 0                      | -83   | 0                    |
| Carrying value at end of period   | 4 156                               | 89                     | 4 245                                       | 18                   |

<sup>\*</sup>The difference between additions and the line Purchases of property, plant and equipment and intangible assets in the condensed consolidated statement of cash flows is due to right-of-use assets allocated emission allowances, accruals for payments and other additions with no cash impact.

## PER OPERATING SEGMENTS

| TOTAL PROPERTY PLANT AND 31 MAR 2022 EQUIPMENT | INTANGIBLE<br>ASSETS |
|--|----------------------|
| Publication paper Europe 3 979                 | 6                    |
| Publication paper Australasia 259              | 1                    |
| Other activities 7                             | 11                   |
| Total 4 245                                    | 18                   |

## 5. OPERATING SEGMENTS

The activities of the Norske Skog group are focused on two business systems, Europe and Australasia. The segment structure is in line with how the group is managed internally. Norske Skog's chief operating decision maker is corporate management, who distribute resources and assess performance of the group's operating segments. Norske Skog has an integrated strategy in Europe and Australasia to maximise the profit in each region. The optimisation is carried out through coordinated sales and operational planning. The regional planning, in combination with structured sales and operational processes, ensures maximisation of profit.

Publication paper includes newsprint and magazine paper. Newsprint includes standard newsprint and improved newsprint used in newspapers, inserts, catalogues etc. Magazine paper includes the paper qualities supercalendered (SC) and lightweight coated (LWC). Magazine paper is used in magazines, catalogues and advertising materials.

Operating revenue consist mainly of sale of goods for both Publication Paper Europe and Publication Paper Australasia.

The publication paper Europe segment encompasses production and sale of newsprint and magazine paper in Europe. All the four European industrial sites and the regional sales organisation are included in the operating segment publication paper Europe.

The publication paper Australasia segment encompasses production and sale of newsprint and magazine paper in Australasia. Norske Skog Boyer, the only producer of newsprint and magazine grade in the region, and the regional sales organisation is included in the operating segment publication paper Australasia. Norske Skog Tasman has ceased production, but production and sales are included in historical segment information up to 30 June 2021.

Activities in the group that do not fall into the operating segments are presented under other activities. This includes corporate functions, Green Energy business and other holding company activities. The sale of the pellets operations of Nature's Flame was completed in March 2022 but is included in Green Energy for historical segment information and up to the completion in first guarter.

#### **FINANCING**

In 2021 Norske Skog entered into credit facility agreements in an aggregate amount of EUR 265 million to finance its EUR 350 million investment in the conversion projects to recycled containerboard.

EUR 193 million was for the project at Norske Skog Golbey and EUR 72 million for the project at Norske Skog Bruck.

The borrowing entities are Norske Skog Bruck GmbH and Norske Skog Golbey SAS, and the facilities are fully guaranteed by Norske Skog ASA.

The facilities will be drawn as capital expenditures are incurred, and repayment is scheduled to commence approximately upon completion of each respective project with average maturity towards the end of 2030. As of 31 March 2022, the credit facilities had been drawn by approximately EUR 29 million.

Norske Skog has a EUR 150 million senior secured bond. The bond matures in March 2026 and has an interest rate of EURIBOR (zero floor) +5.5% with quarterly interest payments.

During the first quarter of 2022, Norske Skog bought back bonds in a nominal amount of EUR 1.1 million. As of 31 March 2022, the

outstanding amount under the EUR 150 million senior secured bond, net of bought back bonds, was EUR 148.9 million.

Norske Skog has EUR 31 million Revolving Credit Facility agreements with a tenor of five years. As of 31 March 2022, the revolving credit facility was undrawn.

The EUR 54 million credit facility for the waste to energy plant in Norske Skog Bruck was fully drawn as of 31 March 2022. It will be repaid in quarterly installments up until the final maturity date in 2028, starting in fourth quarter 2022.

The remaining financing arrangements for the group includes leasing, factoring, and other credit facilities on mill level.

The financing covenants applicable to Norske Skog on a consolidated basis are (i) freely available and unrestricted cash and cash equivalents of minimum NOK 100 million, (ii) EBITDA\* to net interest costs of minimum 2.0:1, and (iii) book equity to total assets of minimum 25% and (iv) minimum LTM EBITDA\* of NOK 400 million. In addition, there are various company specific financial covenants applicable to the subsidiaries acting as borrowers under the respective credit facilities

## **BONDS**

| NOK MILLION | MATURITY   | CURRENCY | INTEREST<br>RATE  | NOMINAL<br>VALUE | AMOUNT<br>OUTSTANDING<br>31 MAR 2022 |
|-------------|------------|----------|-------------------|------------------|--------------------------------------|
| Bond 2026   | March 2026 | EUR      | EURIBOR<br>+5.50% | 150              | 149                                  |

#### **DEBT REPAYMENT SCHEDULE\***

| NOK MILLION                 | 2022 | 2023 | 2024 | 2025 | 2026- |
|-----------------------------|------|------|------|------|-------|
| Bonds                       | 0    | 0    | 0    | 0    | 1 446 |
| Debt to credit institutions | 239  | 150  | 138  | 140  | 406   |
| Total                       | 239  | 150  | 138  | 140  | 1 852 |

Total debt listed in the repayment schedule differ from the carrying value in the balance sheet. This is due to the amortized cost principle.

Financed amounts from securitisation arrangements is classified as interest-bearing current liabilities. This amounts to NOK 42 million in debt repayment in the second quarter of 2022. The financed amount represents a group of individual loans, which are settled individually at maturity of the accounts receivable.

New loans are initiated on a consecutive basis based on new accounts receivable included under the securitization agreement. The liability is in its nature current and Norske Skog does not have an unconditional right to defer settlement beyond twelve months. The liabilities are liabilities that are settled through its normal operating cycle. The corresponding accounts receivable is derecognised when the customer pays it.

<sup>\*</sup>Currency gains and losses on accounts receivable and accounts payable are reported as Operating revenue and Cost of materials respectively.

<sup>\*</sup>The EBITDA used in the financial covenants' calculations may differ from the EBITDA shown in the financial reporting due to adjustment requirements in the financing agreements.

<sup>\*</sup>Not including items relating to IFRS 16.

## 7. ENERGY CONTRACTS, DERIVATIVES AND FINANCIAL INSTRUMENTS CARRIED AT FAIR VALUE

|   | A       | ASSETS      |         | BILITIES    |
|---|---------|-------------|---------|-------------|
| 31 MAR 2022   | CURRENT | NON-CURRENT | CURRENT | NON-CURRENT |
| Energy contracts and embedded derivatives in energy contracts (level 3)     | 629     | 1           | 218     | 317         |
| Other derivatives and financial instruments carried at fair value (level 2) | 0       | 0           | 1       | 0           |
| Total   | 629     | 1           | 219     | 317         |

Norske Skog's portfolio of commodity contracts consists mainly of physical energy contracts. Certain of the energy contracts are measured at fair value. The fair value of commodity contracts is especially sensitive to future changes in energy prices.

The contract prices for energy in Norway are sensitive to change in paper and pulpwood prices. Externally forecasted price increases for paper increases the cost of energy. Although market prices for energy have increased in the short and the long end of the price curve compared to previous quarter, a higher contract price has a negative impact on the fair value of the contracts in the quarter.

Changes in the value of energy-/commodity contracts and embedded derivatives in contracts are presented in the income statement line Derivatives and other fair value adjustments. A sensitivity analysis of

the impact on profit after tax of fluctuations in energy prices, currency and price indices is given in Note 4 in the consolidated financial statements for 2021.

Financial derivative contracts are accounted for at fair value and changes in contracts are presented in the income statement under financial items. A sensitivity analysis of the impact on profit after tax of fluctuations in currency is given in Note 4 in the consolidated financial statements for 2021.

The valuation techniques used are described in Note 17 in the consolidated financial statement for 2021.

## ALTERNATIVE PERFORMANCE MEASURES

The European Securities and Markets Authority's (ESMA) has defined new guidelines for alternative performance measures (APM). An APM is defined as a financial measure of historical or future financial performance, financial position, or cash flows, other than a financial measure defined or specific in the applicable financial reporting framework (IFRS). The company uses EBITDA, EBITDA margin and return on capital employed (annualized) to measure operating performance on Group level. It is the company's view that the APMs provides the investors relevant and specific operating figures which may enhance their understanding of the performance.

EBITDA, EBITDA margin, variable costs, fixed costs, return on capital employed and net interest-bearing debt are defined by the company below.

**EBITDA:** Operating earnings for the period, before restructuring expenses, depreciation and amortization and impairment charges, derivatives and other fair value adjustments, determined on an entity, combined or consolidated basis. EBITDA is used for providing consisting information of operating performance and cash generating which is relative to other companies and frequently used by other stakeholders.

| Net interest-bearing debt                | 924         | 1 054       | 401         |

Capital expenditure (Capex): Purchases of property, plant and equipment and intangible assets.

**Maintenance capex:** Capex required to maintain the Group's current business in accordance with GAAP according to the latest annual financial statements (but excluding any capex for the development of new business).

## Sustainable and innovative industry

Publication paper

Packaging paper

Energy

Bio products

## Bruck industrial site (following strategic projects)

Sustainable and innovative industry driving the green shift

- → 265 000 tonnes LWC magazine paper
- → 210 000 tonnes recycled containerboard
- → 160 000 tonnes refuse derived fuel
- → 20 000 tonnes construction additives
- → 40 MW grid stabilisation capacity
- → 50 GWh district heating energy

## First quarter in brief

## Energy and raw material prices remain volatile

→ Further price increases required and implemented to address unprecedented market conditions

## **EBITDA of NOK 610m in the quarter**

- →EBITDA improvement from previous quarter with margins normalising towards the >10% area
- → Impacted by gain of NOK 175m from sale of the Nature's Flame pellets business

## **Publication paper market remains tight**

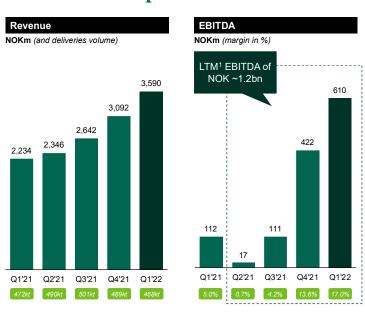

- → Further industry closures from H2 2022
- →Bruck PM3 to stop production in Q3 2022 to finalise the conversion process

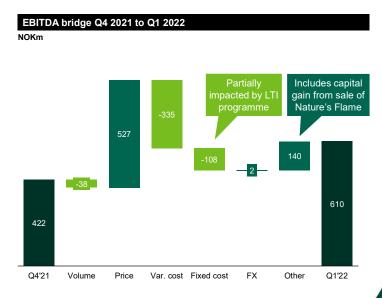

## Bruck waste-to-energy facility in commissioning

- → Under commissioning with Valmet and currently operating at 75%
- → Improves the energy situation and reduces the fossil CO₂ footprint at Bruck

\*\*

## EBITDA improvement in the quarter

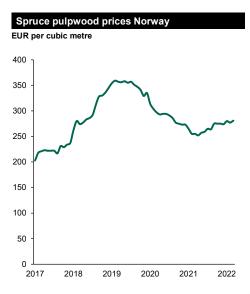

1) LTM = Last Twelve Months, i.e., EBITDA reported over the last four quarters

## Challenging energy and raw material markets

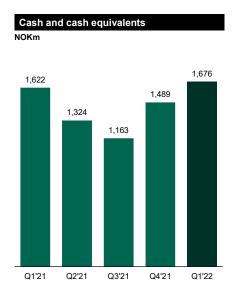

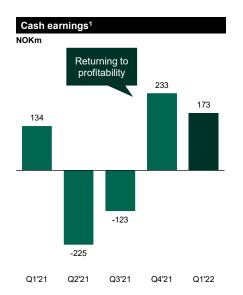

Source: Nord Pool, European Energy Exchange (EEX), Dutch Title Transfer Facility (TTF), RISI, Miljødirektoratet

## Strong liquidity position

1) Cash earnings defined as cash flow from operations less maintenance capex; 2) LTM = Last Twelve Months, i.e., EBITDA reported over the last four quarters; 3) Includes waste-to-energy project at the Bruck industrial site and packaging paper projects at the Bruck and Golbey industrial sites

#### Net debt of NOK 924m

→ Net debt / LTM<sup>2</sup> reported EBITDA: 0.8x

## Total available liquidity of EUR ~470m

- → Cash of NOK 1,676m (EUR ~175m)
- $\rightarrow$  2021 CO<sub>2</sub> comp. of NOK ~290m (EUR ~30m)
- → Undrawn project³ debt of EUR ~236m
- → Undrawn RCF of EUR 31m

## Remaining capex<sup>3</sup> EUR ~300-320m

→ Includes additional civil engineering costs

# Optimising publication paper cash flows and operations

## **Publication paper capacity**

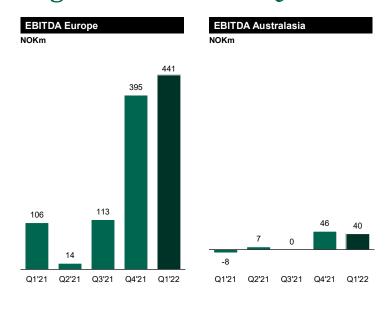

- → Four sites in Europe, one in Australia
- → In total, 11 producing paper machines
- → 1 350k tonnes newsprint
  - → Convert 125k tonnes in Q3 2022 (one machine)
  - → Convert 235k tonnes in Q2 2023 (one machine)
- → 400k tonnes LWC magazine
- → 360k tonnes SC magazine

## **Targets**

- EBITDA margin of +10%

# Publication paper price increases necessary to address unprecedented raw material and energy prices

\*\*

Source: RISI, PPPC

## Entering the growing market for recycled containerboard

Bruck

Golbey

## Packaging paper capacity

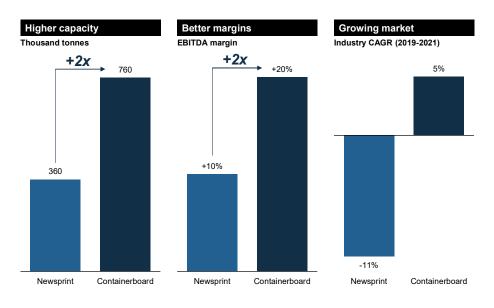

- → 760k tonnes recycled containerboard
- → In the market from Q1 2023

## **Targets**

- → Operating rate of ~95% from 2025-26
- → EBITDA margin of +20%
  - *⊙* Competitive steam supply
  - Tentrally located with low transport costs
  - *▼* Established raw materials access
  - ▼ Ideal machine scale, trim and speed

## \*\*

## Switching to containerboard is attractive across the board

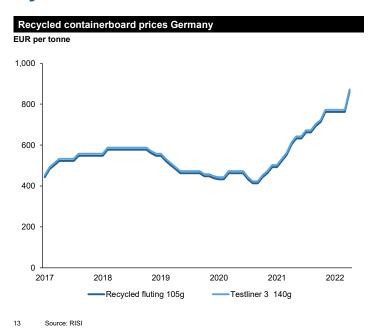

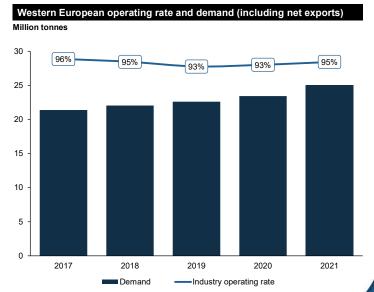

- → Production capacity doubles by switching from newsprint to containerboard
- → Price per tonne for newsprint and containerboard are in the same area
- → Expected containerboard EBITDA margin of +20% versus +10% for newsprint
- → Growing demand for containerboard compared to declining newsprint demand

Source: RISI, PPPC

# Containerboard market remains tight driven by e-commerce and sustainability focus

# Reduce energy purchases and improve green energy mix

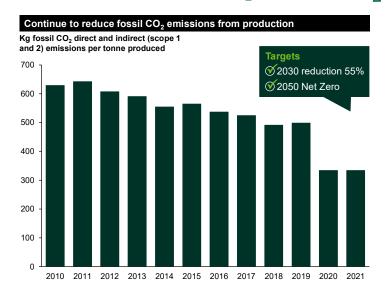

1) RDF = Refuse Derived Fuel, is a fuel produced from various types of waste such as municipal solid waste (MSW), industrial waste or commercial waste

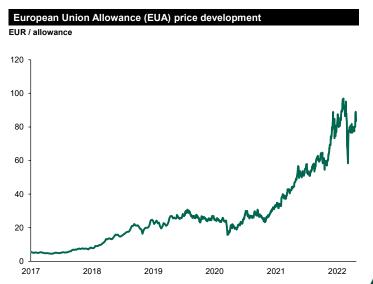

### Waste-to-energy

- → Operating at 75% and in commissioning with Valmet until reaching 100%
- → RDF¹ gate fees less associated costs to contribute NOK ~100m annual EBITDA
- → Reduces gas consumption by ~0.7 TWh and increases electricity by ~0.2 TWh

## Green energy production and energy efficient operations enable annual surplus of CO<sub>2</sub> allowances

Source: European Commission

## Continued commercialisation and scale-up of CEBINA and CEBICO

**CEBINA** 

**CEBICO** 

## **CEBINA**

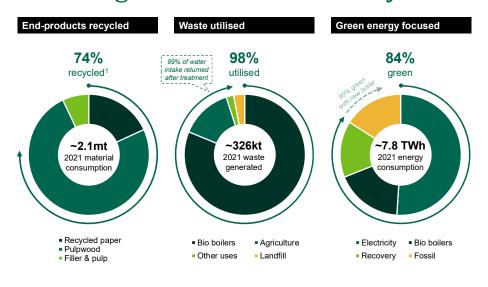

- → Pilot of 100-500 tonnes capacity
- → Proven with regular commercial sales
- → Expanding production capacity
- → Awarded Grønn Plattform grant of NOK ~60m to support further development

## **CEBICO**

- → Pilot of +300 tonnes capacity
- → Innovation Norway grant NOK ~15m
- → Commercialisation and partnership review
- → Potential decision to scale-up in 2022

## Enabling the circular economy

## **Developing climate solutions**

- → Participating in Borg CO2 industry cluster to develop CCUS² technologies with ambition to capture ~630k tonnes
- → Supporting Ocean GeoLoop to develop and pilot its CCUS² technologies to capture close to 100% of CO₂ from flue gas
- → Exploring a range of opportunities within advanced e-fuels, bio-carbon, -chemicals, -additives and -materials

彩

1) Industry recycling rate (CEPI); 2) CCUS = Carbon capture, utilisation and storage

## Outlook

- → Publication paper market expected to be tight as demand remains healthy and capacity closes
- → Waste-to-energy facility to reduce energy purchases and improve green energy mix at Bruck
- → Converting two machines from newsprint production to recycled containerboard production
- → Continued development of existing and potential energy and bio product projects
- → Impact from strategic projects and bio product innovation will become visible over next 1-2 years

## Press release

## Normalised profitability despite energy volatility

Norske Skog's EBITDA in the first quarter of 2022 was NOK 610 million, an increase from NOK 422 million in the fourth quarter of 2021. Sales prices for all grades increased in the quarter as a consequence of unprecedented high energy costs in Europe and a tightened publication paper market situation. The European mills operated at full capacity during the quarter. The pellets facility Nature's Flame was sold at a gain of NOK 175 million in the quarter.

"We have been able to sustain normalised margins on our publication paper products despite the price volatility on raw material and especially energy during the quarter. Following significant capacity closures in the industry over the last two years, the demand for publication paper now exceeds available capacity, causing our mills to run at full capacity," says Sven Ombudstvedt, CEO of Norske Skog.

Cash flow from operations was NOK 196 million in the quarter compared to NOK 317 million in the previous quarter, positively impacted by the improved operating margins, but negatively impacted by change in working capital, being mainly an increase in trade and other receivables. Operating earnings in the first quarter of 2022 were NOK 593 million compared to operating earnings in the fourth quarter of 2021 of NOK 479 million. Net profit in the quarter was NOK 583 million compared to a net profit of NOK 400 million in the previous quarter. Net interest-bearing debt was NOK 924 million at the end of the first quarter, with an equity ratio of 37%.

Norske Skog sold the Nature's Flame pellets company for a consideration of NZD 47.8 million to Talley's Group, a New Zealand-based food company in the quarter. The gain recognised on the sale in the quarter was NOK 175 million.

### Status projects

"Today, we have the official opening of the waste-to-energy plant at Bruck. Reliable access to affordable sources of green energy will be crucial for the long-term competitiveness at Bruck. The completion of the energy plant along with the conversion project demonstrate our long-term committment to the Bruck mill. In addition, our fossil carbon footprint at Bruck will be reduced significantly by this new energy plant", says Ombudstvedt.

The conversion of one newsprint machine both at Golbey and Bruck will add 760 000 tonnes of cost-competitive and low-emission containerboard capacity. The containerboard production will be fully based on recycled fibre, and will utilise green energy generated from the new waste-to-energy facility at the Bruck industrial site and a new biomass plant at the Golbey industrial site. These investments are financed by a debt facility agreements with an aggregate amount of EUR 265 million, having an average maturity towards the end of 2030.

"We are proud of being able to both serve the publication paper and the packaging paper markets in a sustainable and profitable manner in the near future," says Ombudstvedt.

Norske Skog actively works to realise value from its industrial sites by developing existing infrastructure and industry competence. The continued development of CEBICO (bio composites) also progressed well in the quarter. Through the partnerships with Ocean GeoLoop at Norske Skog Skogn and Borg CO2 at Norske Skog Saugbrugs, Norske Skog aims to pursue the opportunity to become CO2 net negative, and to explore economically viable models for utilisation of biogenic CO2.

In addition, Norske Skog aims to eliminate the use of fossil-based means of transportation by 2050. Annually, Norske Skog uses around 2-2.5 million tonnes of recovered paper, wood and wood chips at the European mills.

twitter: @Norske\_Skog

### Norske Skog ASA

"The implementation of the green transition in European industry and the fulfillment of emission obligations in the Glasgow agreement will require that our inbound and outbound transport take place with emission-free transport solutions. Norske Skog Saugbrugs is a very good example. From May 2022, all long distance inbound transport of wood and wood chips to the mill will be on rail", says Ombudstvedt.

| Capacity utilisation (Production / capacity %) | 94      | 95      | 86      | 94     | 86     |

#### **Segment information**

Total annual publication paper production capacity for the group is 2.1 million tonnes, with 1.8 million tonnes in Europe and 0.3 million tonnes in Australia. Norske Skog has numerous ongoing bio products and energy activities at all industrial sites.

Operating revenue increased from the previous quarter due to higher sales prices. The prices increased in the quarter driven by higher energy and other raw material costs. Higher freight rates increased the distribution costs per tonne of paper in the quarter. Variable cost per tonne increased in the quarter due to significantly higher energy prices. Fixed costs per tonne increased somewhat due to higher valuation of the long term incentive programme in the quarter. Group capacity utilisation decreased from previous quarter to 94%.

According to Eurograph, demand for standard newsprint in Europe increased by 6% through February compared to the same period last year. SC magazine demand decreased by around 5%; whereas, LWC paper demand decreased by around 9% through February compared to the same period last year.

According to official Australian trade statistics, demand for newsprint in the first quarter in Australasia decreased by 8% compared to the same period last year.

### Outlook

The unprecedented increases and volatility seen for the largest input factors, particularly energy, are expected to remain in the coming months. The continued price pressure for energy, recovered paper and other input costs in 2022 may result in further publication paper price increases for all grades in Europe.

The ongoing invasion of Ukraine by Russia continues to create uncertainty in the development of the global economy and raw material markets and in particular the European energy markets, which is important for Norske Skog's operations. Disruptions in global supply chains may cause further operational challenges in 2022.

The significant capacity closures and conversion to packaging paper in the industry continues to positively impact the market balance for publication paper. Additional capacity closures have been announced for 2022 and 2023. Operating rates are expected to remain high for the industry during 2022.

The waste-to-energy facility at Norske Skog Bruck is in the commissioning phase and is currently operating at 75% utilisation. The facility will substantially reduce gas consumption, and thus, CO2 emissions for Norske Skog Bruck.

At Norske Skog Bruck, the production of newsprint will cease in the third quarter, and Bruck will enter the packaging paper market in the first quarter of 2023. Norske Skog Golbey is preparing for establishing packaging paper production, which is expected to commence in the fourth quarter of 2023.

Norske Skog continues to develop business opportunities for CEBINA and CEBICO. This includes evaluating a potential capacity increase for CEBICO beyond the existing 300 tonnes annual pilot-scale capacity. The pilot facility will enable production and delivery of larger test volumes.

### **About Norske Skog**

Norske Skog is a world leading producer of publication paper with strong market positions and customer relations in Europe and Australasia. The Norske Skog Group operates four mills in Europe, two of which will produce recycled containerboard following ongoing conversion projects. In addition, the Group operates one paper mill in Australia. Norske Skog aims to further diversify its operations and continue its transformation into a growing and high-margin business through a range of promising energy and bio product development projects. The Group has approximately 2 100 employees, is headquartered in Norway and listed on the Oslo Stock Exchange under the ticker NSKOG.

#### Presentation and quarterly material

The company will not hold a live presentation, but will arrange a webinar today at 08:30 CEST for pre-registered participants. The presentation, the quarterly financial statements and the press releases are available on www.norskeskog.com and published on www.newsweb.no under the ticker NSKOG. If you want to receive future Norske Skog press releases, please subscribe through the website of the Oslo Stock Exchange www.newsweb.no.

## **Pressemelding**

## Normalisert lønnsomhet tross volatile energimarkeder

Norske Skogs EBITDA i første kvartal 2022 var NOK 610 millioner, en oppgang fra NOK 422 millioner i fjerde kvartal 2021. Salgsprisen økte for alle papirkvaliteter i kvartalet, som en nødvendig konsekvens av rekordhøye energikostnader i Europa og et sterkt publikasjonspapirmarked. De europeiske fabrikkene hadde full kapasitetsutnyttelse i kvartalet. Nature's Flames pelletsanlegg ble solgt med en gevinst på 175 millioner kroner i kvartalet.

"Vi har vært i stand til å opprettholde normale marginer på våre trykkpapirprodukter til tross for de volatile prisene på råvarer og spesielt energi i løpet av kvartalet. Etter betydelige kapasitetsstenginger i industrien de to siste årene, overstiger etterspørselen etter publikasjonspapir nå tilgjengelig kapasitet, som gjør at våre maskiner kan kjøre for fullt», sier Sven Ombudstvedt, konsernsjef i Norske Skog.

Kontantstrøm fra driften var NOK 196 millioner i kvartalet sammenlignet med NOK 317 millioner kroner i forrige kvartal. Kontantstrømmen var positivt påvirket av forbedrede driftsmarginer, men negativt påvirket av endringer i arbeidskapitalen, som i hovedsak skyldes økninger i kundefordringer. Driftsresultatet i første kvartal 2022 var på NOK 593 millioner sammenlignet med et driftsresultat på NOK 479 millioner i fjerde kvartal 2021. Overskuddet i kvartalet var NOK 583 millioner mot et overskudd på NOK 400 millioner i forrige kvartal. Netto rentebærende gjeld var NOK 924 millioner ved utgangen av første kvartal, med en egenkapitalandel på 37%.

Norske Skog solgte i kvartalet pelletsselskapet Nature's Flame for et vederlag på NZD 47,8 millioner til Talley's Group, et New Zealand-basert næringsmiddelselskap. Bokført gevinst ved salget i kvartalet var NOK 175 millioner.

### Status prosjekter

«Vi har i dag den offisielle åpningen av det nye energianlegget i Bruck. Forutsigbar tilgang til rimelig, grønn energi vil være avgjørende for den langsiktige konkurranseevnen til Bruck. Både byggingen av energianlegget kombinert med konverteringsprosjektet viser vårt langsiktige engasjement for Bruckfabrikken. I tillegg vil utslippene av fossilt CO2 vil bli redusert betydelig av det nye energianlegget», sier Ombudstvedt.

Konvertering av avispapirmaskiner ved både Bruck og Golbey vil gi 760 000 tonn med konkurransedyktig, lavkostnads- og lavutslipps emballasjekapasitet. Emballasjeproduksjonen vil være fullt ut basert på resirkulert fiber og bruke grønn energi generert fra det nye forbrenningsanlegget for avfall i Bruck og fra et nytt biomasseanlegg på fabrikkområdet i Golbey. Disse investeringene er finansiert med låneavtaler til et samlet beløp på EUR 265 millioner, med en gjennomsnittlig løpetid frem til slutten av 2030.

«Vi er stolte av å kunne betjene både publikasjons- og emballasjepapirmarkedet på en bærekraftig og lønnsom måte i nær fremtid,» sier Ombudstvedt.

Norske Skog arbeider aktivt for å realisere verdier fra industrianleggene ved å utvikle eksisterende infrastruktur og bransjekompetanse. Arbeidet med å utvikle biokompositter (CEBICO) viste god fremdrift i kvartalet. Gjennom partnerskapene med Ocean GeoLoop på Skogn og Borg CO2 på Saugbrugs, har Norske Skog som mål å utnytte mulighetene til å bli CO2 netto negative, samt å utforske økonomisk levedyktige metoder for bruk av biogent CO2.

I tillegg har Norske Skog et mål om å eliminere bruken av fossilbaserte transportmidler innen 2050. Årlig bruker Norske Skog rundt 2-2.5 millioner tonn returpapir, tre og flis ved de europeiske fabrikkene.

«Gjennomføring av det grønne skiftet i europeisk industri og oppfyllelse av utslippsforpliktelser i Glasgow-avtalen vil kreve at vår inn- og uttransport skjer med utslippsfrie transportløsninger. Norske Skog Saugbrugs er et veldig godt

twitter: @Norske\_Skog

### Norske Skog ASA

eksempel. Fra mai 2022 vil all langveistransport av tømmer og flis til fabrikken gå på jernbane», sier Sven Ombudstvedt.

#### Nøkkeltall, første kvartal 2022

| NOK millioner (om ikke annet er oppgitt)         | Q1 2022 | Q4 2021 | Q1 2021 | Hittil 22 | Hittil 21 |
|--|---------|---------|---------|-----------|-----------|
| Resultatregnskap                                 |         |         |         |           |           |

| Kapasitetsutnyttelse (produksjon/kapasitet %)    | 94      | 95      | 86      | 94        | 86        |

#### Segmentinformasjon

Samlet årlig produksjonskapasitet for publikasjonspapir for konsernet er 2,1 millioner tonn. I Europa er konsernets kapasitet 1,8 millioner tonn, mens i Australia er kapasiteten 0,3 millioner tonn. Norske Skog har en rekke pågående bio produkt- og energiaktiviteter ved alle industrianlegg.

Driftsinntektene økte fra forrige kvartal som følge av høyere salgspriser. Salgsprisene økte i kvartalet på grunn av høyere energi- og råvarekostnader. Høyere fraktrater økte distribusjonskostnadene per tonn papir i kvartalet. Variabel kostnad per tonn økte i kvartalet på grunn av betydelig høyere energikostnader. Faste kostnader per tonn økte noe i kvartalet på grunn av høyere verdsettelse av det langsiktige insentivprogrammet. Konsernets kapasitetsutnyttelse falt noe fra forrige kvartal til 94%.

Ifølge Eurograph økte etterspørselen etter standard avispapir i Europa med 6% til og med februar sammenlignet med samme periode i 2021. Etterspørselen etter superkalandrert magasinpapir (SC) falt med rundt 5%, og LWC magasinpapir falt med rundt 9% til og med februar sammenlignet med samme periode i 2021. I følge offisiell australsk handelsstatistikk falt etterspørselen etter avispapir i første kvartal i Australasia med 8% sammenlignet med samme periode i fjor.

#### Utsikter

De rekordhøye økningene i de største innsatsfaktorene, spesielt energi, er forventet å vedvare de neste månedene. De fortsatt høye prisene på energi, returpapir og andre innsatskostnader i 2022 kan nødvendiggjøre prisøkninger for for alle kvaliteter av publikasjonspapir i Europa.

Russlands pågående invasjon av Ukraina fortsetter å skape usikkerhet i utviklingen av den globale økonomien og råvaremarkedene og spesielt for de europeiske energimarkedene, som er viktig for Norske Skogs virksomhet. Problemer i de globale forsyningskjedene kan føre til ytterligere driftsutfordringer i 2022.

De betydelige kapasitetsstengningene og emballasjekonverteringene i bransjen har påvirket markedsbalansen for publikasjonspapir positivt. Ytterligere kapasitetsstenginger har blitt annonsert for 2022 og 2023. Kapasitetsutnyttelsen i bransjen forventes å forbli høye i 2022.

Energiforbrenningsanlegget ved Bruck er nå midt i igangkjøringsfasen og opererer nå på 75% kapasitetsutnyttelse. Anlegget vil redusere gassforbruket og dermed CO2-utslippene betydelig for Norske Skog Bruck.

Norske Skog Bruck vil slutte å produsere avispapir i løpet av tredje kvartal, og Bruck vil gå inn i emballasjepapirmarkedet i første kvartal 2023. Norske Skog Golbey forbereder etableringen av emballasjepapirproduksjon med forventet produksjonstart i fjerde kvartal 2023.

Norske Skog vil utvikle forretningsmuligheter for CEBINA og CEBICO. Dette betyr å evaluere en potensiell kapasitetsøkning for CEBICO utover den eksisterende pilotanleggskapasiteten på 300 tonn årlig. Pilotanlegget vil muliggjøre produksjon og leveranser av større testvolumer til potensielle kunder.

#### **Om Norske Skog**

Norske Skog er en verdensledende produsent av publikasjonspapir med sterke markedsposisjoner og kundeforhold i Europa og Australasia. Norske Skog konsernet driver fire fabrikker i Europa, hvorav to vil produsere resirkulert emballasje etter gjennomføringen av de planlagte konverteringsprosjektene. I tillegg driver konsernet en papirfabrikk i Australia. Norske Skog tar sikte på å diversifisere virksomheten ytterligere og fortsette omstillingen til en voksende og høy-margins virksomhet gjennom en rekke spennende energi- og bioproduktprosjekter. Konsernet har cirka 2.100 ansatte, hovedkontor i Norge og er notert på Oslo Børs under tickeren NSKOG.

## Presentasjon og kvartalsmateriell

Selskapet vil ikke holde en live presentasjon, men vil arrangere et webinar idag klokken 08:30 for forhåndsregistrerte deltakere.
